

## Water Quality Starts at Home

where each of us has an impact on the pollutants that we introduce into our environment. The US Environmental Protection Agency (EPA) suggests these tips for protecting water quality:

- 1 Use fertilizers sparingly, and sweep excess off driveways and sidewalks.
- 2 Never dump or discard anything down storm drains.
- 3 Vegetate bare spots in your yard.
- 4 Compost your yard waste.
- 5 Minimize pesticide use, and consider Integrated Pest Management (IPM).
- 6 Direct gutter downspouts onto soil, away from paved surfaces.
- 7 Take your car to a car wash instead of washing it in the driveway.
- 8 Check your car for leaks, and recycle motor oil.
- 9 Pick up after your pet.
- 10 Have your septic system pumped and inspected regularly.
